***Urban Waterfall Features Are Scientifically Proven to Naturally Clean the Air, Improve Moods and Be Great For Your Health!  
There are no other water features available in the world that even come close to the health benefits and unique designs offered by an Urban Waterfall feature. And that's a fact!***

***Yes, the ACCENT'S line of water features is the Healthcare Professional's Number One choice. They are perfect for hospitals, medical and dental offices, spas and anywhere else that infection control is important.***

***Guess that's why so many healthcare providers are specifying our ACCENT'S line for their water features.***

Urban Waterfalls – amazing water features that not only look great; they actually remove bacteria, dust and other air-borne pollutants from the air while creating a serene atmosphere your patients will love.

Designed and created by the only water feature company with more than 6 decades of manufacturing experience specifically for healthcare environments.

## **Infection Control**

A recent study at the University of Colorado has proven that ACCENT'S water features actually **clean the air more thoroughly than other filtration systems**. ACCENTS water features are the only ones that prevent bacteria from growing in their reservoirs.

Yes, every ACCENTS water feature comes standard with a reservoir coated with [Saniguard](#); which **kills harmful bacteria, viruses and fungi** on contact. As an added level of protection, the water in Urban Waterfalls fountains circulates through an **ultraviolet antimicrobial system (Pathoban AG2544™ patent pending)**. Thus irritants, bacteria, allergens, dust, smoke and pathogens are actually pulled from the air, trapped by the water and treated so they no longer cause any harm. It means less dust, pollutants and a healthier environment for your hospital or healthcare center. Complete your system with reverse/osmosis water filtration.

In addition to infection control; a water feature by ACCENTS (like all water features) also produces negative ions, which have been shown to improve a person's mood and health!

## **Custom Healthcare Water Features**

ACCENT'S distinctive line of water features consists of several pre-designed units in brushed stainless steel, powdered coated stainless and antiqued copper in free-standing or wall-mounted styles. Or you can customize your own unit using a variety of face materials to better meet the specific needs of your restaurant. They can meet and exceed any design requirements – no matter how unique.

Let your imagination be your guide. ACCENTS has years of experience working with healthcare environments and design professionals in the creation of custom water features that will integrate seamlessly with any medical or dental environment. Please contact us to speak with our design staff to learn more about healthcare water features and alternative materials.

### Why Healthcare Providers Choose ACCENTS?

- Only Water Feature that is Hospital Approved
- Clinically Proven to Remove Bacteria, Dust & Pollutants from the Air
- Improve Patients' & Employees' Moods
- The Only Water features Designed for Healthcare Environments
- Completely Made in America
- Backed By Over 6 Decades of Manufacturing Experience
